

2020 CSRC Carbon Black Star Program- Summer Internship

CSRC Group is now setting up new plants in both India and Turkey which is the key to global expansion. In addition, the completion of Linyuan R&D center last year is also considered as recognition of carbon black business future development. Under this rapid growing pace, we proudly present CSRC Carbon Black Star Program - Summer Internship to all the rising stars out there.

During the internship period, you can explore not only how carbon black plant operation works, but learn professional knowledge of R&D and processing. Want to know more? Visit our [Website](#) to experience how CSRC is dedicated to environmental protection as a circular economy business, and to see the global expanding ambition of CSRC Group on [LinkedIn](#).

Join us to explore the future and beyond. You will be the shining star of carbon black.
